- SOFT SKILL:
- Critical Thinking, creativity, and problem-solving
- Proactivity, good team player
- Good teamworking skills, manager time

### // SUMMARY

#### Civil construction and industry

2018 - 2023

Hanoi University Of Civil Engineering

- After 4 years of studying at the University of Construction, I graduated with a good degree in the specialized field of civil and industrial construction

#### Full-Stack Java Web for Beginner

19/06/2023 - 15/01/2024

FPT Software Academy

- During the 6 months of studying at FPT Software Academy, I learned a range of topics from basic to advanced, including IT Basics, SQL Database Fundamentals, Java Core, Front-end Essentials, and Java Programming languages.  
Currently, I am capable of independently developing a project using Java, utilizing front-end tools such as Visual Studio Code and JavaScript, and employing back-end tools like IntelliJ. I build projects using Spring Boot and Spring MVC.

At the end of the course, we had a group project that needed completion. In my group, I assumed the role of a leader. My responsibilities included managing the source code on GitHub and coordinating the team members. For the project, I delegated tasks among team members, taking on responsibilities such as designing and coding the CRUD functionalities (pagination, login/logout/forgot password with email functionality, and import/export templates files). I also handled the role of setting project permissions and provided support to my team members throughout the development process.

### // CAREER OBJECTIVE:

I aspire to work in a positive and supportive work environment with excellent benefits, a friendly atmosphere, and management that values its employees. Over the next two years, my goal is to advance to the position of Mid-level Developer in the programming industry, accompanied by obtaining specific certifications such as OCA, OCP, and others. Additionally, I aim to enhance my communication skills, reaching a proficiency level of 750 in English, enabling effective communication with international clients.
